Assignment 4: Introduction to JavaScript

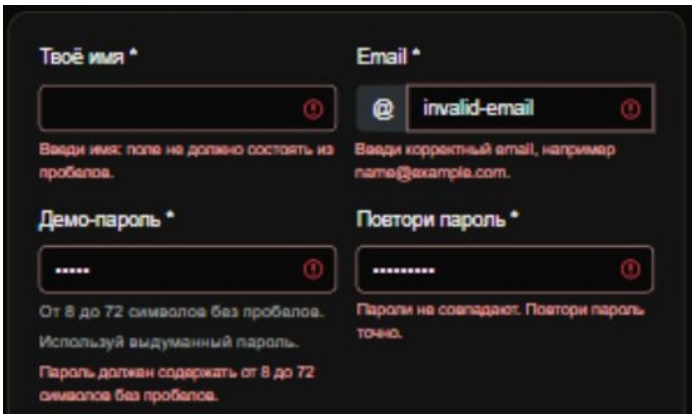

Team: Music Band | Group: SE-2501

Members: Kanatov Sabyrzhan and Zhaxylyk Alikhan

Objective: Add five interactive JavaScript features to the existing Music Band website.

Task 1. Form validation

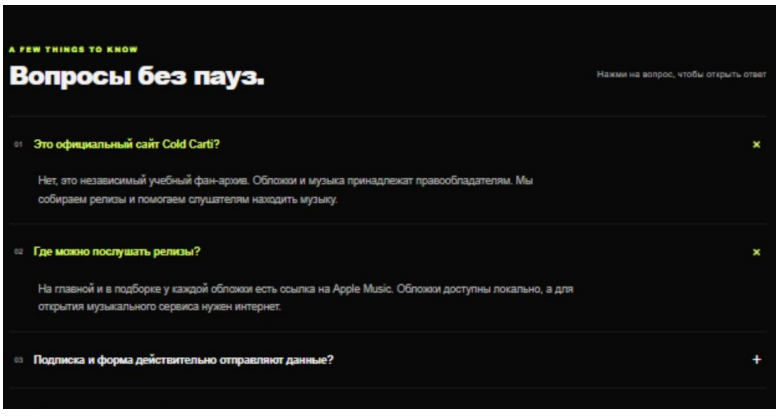

1. Add name, email, password, confirmation and message fields to the contact form.
2. Check empty fields, email format, password length and matching passwords with JavaScript.
3. Show an error beside each incorrect field. Show a success message when everything is valid.

Contact form with validation errors.

Task 2. FAQ accordion

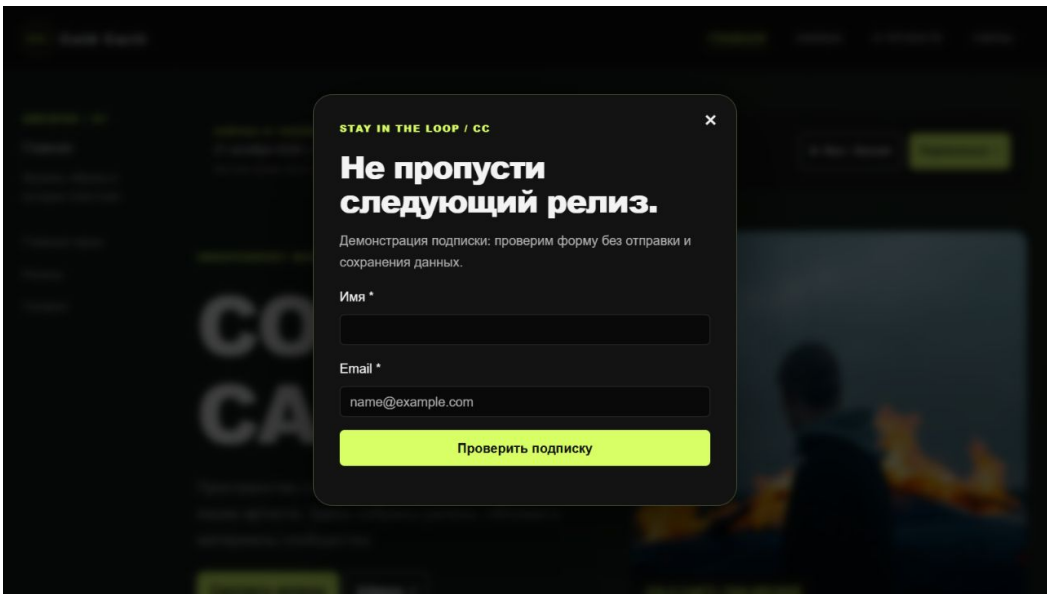

1. Add questions and answers to the About page.
2. Hide the answers when the page opens.
3. Use a click event to show or hide an answer with a short transition.

FAQ with answers opened.

Task 3. Subscription popup

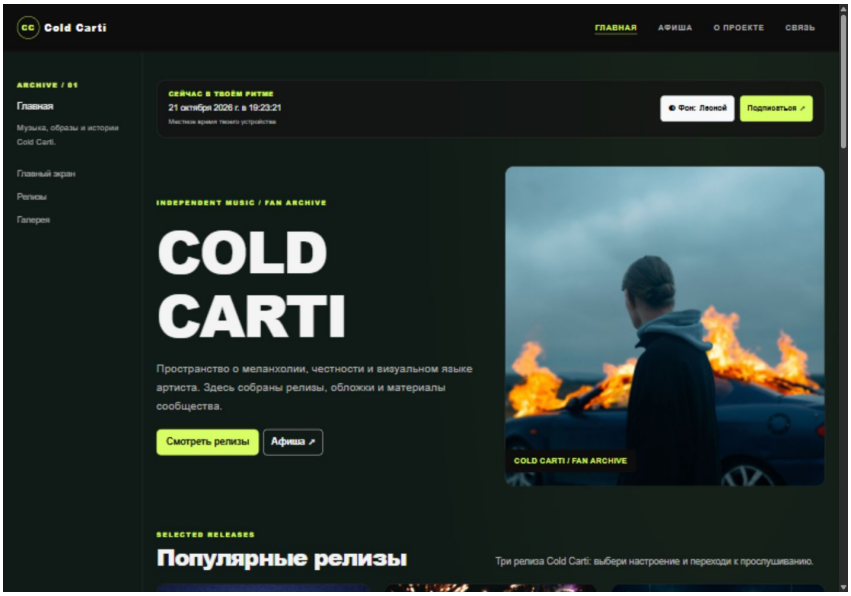

1. Add a hidden subscription form with name and email fields.
2. Open it when the Subscribe button is clicked.
3. Close it with the close button, an outside click or Escape.

Subscription popup on the page.

Task 4. Background color

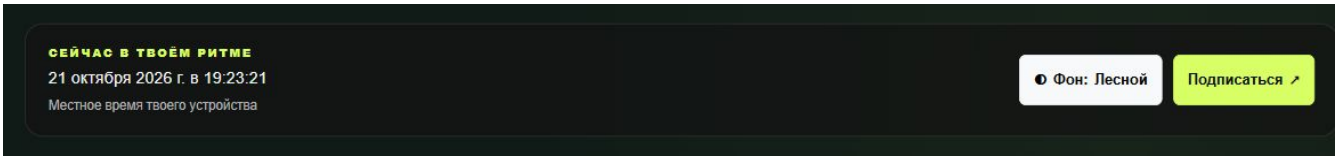

1. Add a button and a list of four background colors.
2. Use JavaScript to select the next color after each click.
3. Update the background and the color name shown beside the button.

Page after changing the background color.

Task 5. Current date and time

1. Add a date and time block to the page.
2. Get the current date and time with JavaScript's Date object.
3. Format the result and refresh it every second with setInterval.

Current date and time shown on the website.

Checks

Checked form errors, valid input, FAQ toggling and popup controls in Chromium.

Checked the page layout at widths from 320 to 1440 pixels.

Reflection

This work shows how JavaScript handles clicks, checks input and updates a page. The forms are demos and do not send or save data.
